researchers

## 2024 Call for Participants

*Open now*

This program is designed to bridge the skill set development gap within the workforce which is needed to address global challenges, including social, economic, and ecological dimensions. It aims to inspire a new paradigm of leadership and equip emerging academics with the skills to co-create meaningful change.

### What you get

A community of practice to implement your learning through supporting university students' projects and facilitating change at your institution

Monthly online meetings will alternate personal development sessions with professional training to build supportive social interaction

Connection and joint learning with like-minded early career researchers from around the world

Monthly individual coachings and peer coaching groups to support your individual development

### Who it is for

Ph.D. students, Masters students, or postdoctoral researchers who:

- address sustainability challenges in their research and/or teaching
- have a high motivation to develop personally and professionally
- have the intrinsic motivation to improve their own understanding of creativity and pedagogy towards the overall pursuit of sustainable development
- have a vision of an economic system that respects ecosystem limits and serves society

**Participation is free of charge**

**4-5h/month March-December 2024**

**You receive a Certificate after completion**

### How to join?

Prior to the official application, we would like to virtually meet every potential participant. For that purpose we have organized LEAP Researchers Informational Calls. Please register [here](#), and we will send you a Zoom invitation.
